**Yosemite Drive Upgrade
PM&E Project #13-36**

Project Newsletter - May 24, 2017
Project Update and Open House Announcement

Project Update

The Municipality of Anchorage (MOA), Project Management & Engineering Department (PM&E) is preparing to begin construction on the Yosemite Drive Upgrade from Eagle River Loop Road to Yellowstone Drive. PM&E's contractor, Mass Excavation, Inc., will perform the construction of this project beginning May 30th, 2017 and ending in early October 2017. It is PM&E's goal to complete the majority of the work in front of the Eagle River High School by August 5th. Both vehicular and pedestrian traffic along Yosemite Drive will be maintained throughout the duration of the project, but drivers and pedestrians should anticipate some delays and adjustments to the traffic pattern.

MOA is implementing this project on behalf of the Anchorage School District. Professional & Technical Services, Inc. (PTS) has been hired by MOA to assist with the management of this project. Improvements will include curb and gutter, pedestrian facilities on both sides of the street, piped storm drain and street lighting. The project has been funded by State grants and all funding is in place to complete construction. In addition, MOA will be installing a new water main, an additional northbound lane and driveway accesses to serve adjacent land owned by the Alaska Mental Health Trust. The Trust has agreed to fund these additional improvements.

Open House

PM&E along with Mass Excavation, Inc. will be hosting an open house on **Wednesday, May 31 from 5pm-7pm in the Eagle River High School Library**. Project staff will be available to describe planned traffic and pedestrian detour information and to answer any questions you may have.
