2021 RCCC Resiliency Committee Goals

March 15, 2021

Primary Community Project Goals

1.   Plan and implement **2021 Resilience (Firewise awareness) programming**, build on 2019 RCCC events and communications with MOA FW forester in coordination with HALO, FEMA, NFPA, All State, SOA Forestry and MOA agencies. (January mailing, March/April awareness and RSG prep with HaLO, April/May mitigation, chipper day and drill.) (Review existing resources and gaps.)

2.   Plan and hold a **wildfire table top drill** with the MOA OEM staff and FW with case/drill materials that can be moved out to HOA, N'd Watch and Emergency Watch programs in coop with agencies for citizen drills as part of RSG. (Optional - find a willing HOA to host a pilot program.)

3.   Investigate and increase N'd Watch and previous emergency watch program as strategy to **organize isolated residential areas** and increase their all hazard response capability and seek pilot areas to organize with APD N'd/Crime Watch coordinator.

3.   Evaluate pursuing **FireWise Site designation** for the RCCC with FW

Community Advocacy Initiatives

1.   Establish **ROW standards** and **locations (John has)** with AFD Forester and MOA ROW manager to improve egress and reduce hazards and act as shaded fire breaks along critical routes and defense lines including utilities (CEA), LRSA/Roads, and private property owners.

2.   Support the planning and **funding to develop missing road connections** and emergency egress/access routes.

3.   Seek funding to **expand access to woodlots** and reduce the costs to encourage more fire load reduction.

4.   **Improve and share emergency communication procedures** with MOA OEM Staff - MOA

5.   Outreach, engagement and recognition of **volunteers assisting with hazard reduction** projects organized by Firewise and community resiliency including Team Rubicon, Trail Watch, and Boy Scouts.

6. Monitor and advocate for **technology development** work that FW is piloting and funding including the wildfire detection camera testing.

7. Wildfire **hazard mitigation data** server, data updates, fire break locations, mitigation plan updates. (UAA, FW…). (FEMA GIS project funding.)
